VOLUME CONTENTS

January, Number 1

O. G. Martynenko	1	Heat and mass transfer bibliography – CIS works
H.-T. Chen, S.-Y. Lin, H.-R. Wang and L.-C. Fang	15	Estimation of two-sided boundary conditions for two-dimensional inverse heat conduction problems
V. D. Sakalis, P. M. Hatzikonstantinou and N. Kafousias	25	Thermally developing flow in elliptic ducts with axially variable wall temperature distribution
M. Birouk and I. Gökalp	37	A new correlation for turbulent mass transfer from liquid droplets
B. Han, R. J. Goldstein and H. G. Choi	47	Energy separation in shear layers
S. E. Hommema, K. A. Temple, J. D. Jones and V. W. Goldschmidt	57	Heat transfer in condensing, pulsating flows
J. R. Shenefelt, R. Luck, R. P. Taylor and J. T. Berry	67	Solution to inverse heat conduction problems employing singular value decomposition and model-reduction
Y. Demirel and S. I. Sandler	75	Effects of concentration and temperature on the coupled heat and mass transport in liquid mixtures
T. Okawa, T. Kitahara, K. Yoshida, T. Matsumoto and I. Kataoka	87	New entrainment rate correlation in annular two-phase flow applicable to wide range of flow condition
L. M. Pereira, J. S. Pérez Guerrero, N. Brazão and R. M. Cotta	99	Compressible flow and heat transfer in ultracentrifuges: hybrid analysis via integral tranforms
J. S. Lee and I. S. Jung	113	Effect of bulk flow pulsations on film cooling with compound angle holes
B. Pan, D.-Y. Shang, B. Q. Li and H. C. de Groh	125	Magnetic field effects on *g*-jitter induced flow and solute transport
H.-W. Lee, J. J. Park and J. S. Lee	145	Flow visualization and film cooling effectiveness measurements around shaped holes with compound angle orientations
M. Li, D. Zeng and T. Zhu	157	Instability of the Marangoni convection in a liquid bridge with liquid encapsulation under microgravity condition
T. S. Zhao and Q. Liao	165	Rapid vaporization of subcooled liquid in a capillary structure

M. TANCREZ, M. HILKA and J. TAINE — 173 — Comparison between local and homogenized models of radiative transfer in a set of parallel ducts considered as a porous medium

M. PAVAGEAU and C. REY — 181 — Observation of volume variation effects in turbulent free convection

S. J. MATYSIAK, A. A. YEVTUSHENKO and E. G. IVANYK — 193 — Contact temperature and wear of composite friction elements during braking

R. KUMAR, H. K. VARMA, B. MOHANTY and K. N. AGRAWAL — 201 — Augmentation of heat transfer during filmwise condensation of steam and R-134a over single horizontal finned tubes

Technical Notes

D. H. LEE, Y. M. LEE, Y. T. KIM, S. Y. WON and Y. S. CHUNG — 213 — Heat transfer enhancement by the perforated plate installed between an impinging jet and the target plate

P. L. SPEDDING and R. K. COOPER — 219 — A note on the prediction of liquid hold-up with the stratified roll wave regime for gas/liquid co-current flow in horizontal pipes

D. H. LEE, S. Y. WON, Y. T. KIM and Y. S. CHUNG — 223 — Turbulent heat transfer from a flat surface to a swirling round impinging jet

D.-Y. LEE, J. S. JIN and B. H. KANG — 229 — Momentum boundary layer and its influence on the convective heat transfer in porous media

Announcement

235 — The 13th International Symposium on Transport Phenomena (ISTP-13) July 14-18, 2002, Convention Centre, Victoria, BC, Canada

January, Number 2

P. E. MCSHARRY, J. H. ELLEPOLA, J. VON HARDENBERG, L. A. SMITH, D. B. R. KENNING and K. JUDD — 237 — Spatio-temporal analysis of nucleate pool boiling: identification of nucleation sites using non-orthogonal empirical functions

A. Y. LOOI, Q.-M. MAO and M. RHODES — 255 — Experimental study of pressurized gas-fluidized bed heat transfer

T. TAGAWA, R. SHIGEMITSU and H. OZOE — 267 — Magnetizing force modeled and numerically solved for natural convection of air in a cubic enclosure: effect of the direction of the magnetic field

M. D. MAT and O. J. ILEGBUSI — 279 — Application of a hybrid model of mushy zone to macrosegregation in alloy solidification

O. ZÜRCHER, D. FAVRAT and J. R. THOME — 291 — Development of a diabatic two-phase flow pattern map for horizontal flow boiling

O. Zürcher, D. Favrat and J. R. Thome — 303 — Evaporation of refrigerants in a horizontal tube: an improved flow pattern dependent heat transfer model compared to ammonia data

C. Cianfrini, M. Corcione and D. M. Fontana — 319 — Laminar free convection from a vertical plate with uniform surface heat flux in chemically reacting systems

G. Jilani, S. Jayaraj and M. A. Ahmad — 331 — Conjugate forced convection–conduction heat transfer analysis of a heat generating vertical cylinder

J. van Berkel, C. C. M. Rindt and A. A. van Steenhoven — 343 — Thermocline dynamics in a thermally stratified store

H. S. Lee, W. W. Carr, H. W. Beckham and J. Leisen — 357 — A model of through-air drying of tufted textile materials

S. Glod, D. Poulikakos, Z. Zhao and G. Yadigaroglu — 367 — An investigation of microscale explosive vaporization of water on an ultrathin Pt wire

S. K. Kim and W. I. Lee — 381 — Solution of inverse heat conduction problems using maximum entropy method

S.-C. Wang, C.-K. Chen and Y.-T. Yang — 393 — Natural convection of non-Newtonian fluids through permeable axisymmetric and two-dimensional bodies in a porous medium

J. Mitrovic — 409 — On the profile of the liquid wedge underneath a growing vapour bubble and the reversal of the wall heat flux

L. H. Liu, H. P. Tan and Q. Z. Yu — 417 — Internal distribution of radiation absorption in one-dimensional semitransparent medium

P.-Y. Wang, H.-E. Cheng and H.-P. Tan — 425 — Transient thermal analysis of semitransparent composite layer with an opaque boundary

Y. S. Teplitskiy — 441 — Similarity of transport processes in disperse systems with suspended particles

Technical Notes

W. Lin, S. W. Armfield and P. L. Morgan — 451 — Unsteady natural convection boundary-layer flow along a vertical isothermal plate in a linearly stratified fluid with $Pr > 1$

S. S. Yee and K. Kamiuto — 461 — Effect of viscous dissipation on forced-convection heat transfer in cylindrical packed-beds

January, Number 3

E. R. Meinders and K. Hanjalić — 465 — Experimental study of the convective heat transfer from in-line and staggered configurations of two wall-mounted cubes

V. M. Wasekar and R. M. Manglik	483	The influence of additive molecular weight and ionic nature on the pool boiling performance of aqueous surfactant solutions
G.-S. Zhu and R. D. Reitz	495	A model for high-pressure vaporization of droplets of complex liquid mixtures using continuous thermodynamics
N. Mendes, P. C. Philippi and R. Lamberts	509	A new mathematical method to solve highly coupled equations of heat and mass transfer in porous media
V. A. Iyer, J. Abraham and V. Magi	519	Exploring injected droplet size effects on steady liquid penetration in a diesel spray with a two-fluid model
L.-J. Guo, Z.-P. Feng and X.-J. Chen	533	Transient convective heat transfer of steam–water two-phase flow in a helical tube under pressure drop type oscillations
P. G. Vicente, A. García and A. Viedma	543	Heat transfer and pressure drop for low Reynolds turbulent flow in helically dimpled tubes
A. L. Yarin, A. Yu. Gelfgat and P. Z. Bar-Yoseph	555	Enhancement of mass transfer in a two-layer Taylor–Couette apparatus with axial flow
J. L. Niu and L. Z. Zhang	571	Heat transfer and friction coefficients in corrugated ducts confined by sinusoidal and arc curves
L. Reichelt, U. Meingast and U. Renz	579	Calculating transient wall heat flux from measurements of surface temperature
F. Ogino, T. Inamuro, K. Mizuta, A. Kino and R. Tomita	585	Flow characteristics on a heated rotating disc under natural convection dominant conditions
W. T. Kim, C. Bai and Y. I. Cho	597	A study of $CaCO_3$ fouling with a microscopic imaging technique
K. C. Ng, H. Xue and J. B. Wang	609	Experimental and numerical study on a miniature Joule–Thomson cooler for steady-state characteristics
Z.-C. Lin and W.-J. Wu	619	3-D finite element simulation of wafer thermal distortion and stress fields in exposure process
Z. L. Yang, B. Palm and B. R. Sehgal	631	Numerical simulation of bubbly two-phase flow in a narrow channel
A. Barletta	641	Fully developed mixed convection and flow reversal in a vertical rectangular duct with uniform wall heat flux
N. Luna, F. Méndez and C. Treviño	655	Conjugated heat transfer in circular ducts with a power-law laminar convection fluid flow
T. Marimbordes, A. Ould El Moctar and H. Peerhossaini	667	Active control of natural convection in a fluid layer with volume heat dissipation

E. DUMONT, F. FAYOLLE, V. SOBOLÍK and J. LEGRAND 679 Wall shear rate in the Taylor–Couette–Poiseuille flow at low axial Reynolds number

Technical Notes

C. C. PASCUAL, S. M. JETER and S. I. ABDEL-KHALIK 691 Visualization of boiling bubble dynamics using a flat uniformly heated transparent surface

S. C. MISHRA and M. PRASAD 697 Radiative heat transfer in absorbing–emitting–scattering gray medium inside 1-D gray Cartesian enclosure using the collapsed dimension method

February, Number 4

J. C. CHAI, R. B. BALIGA, K. C. KARKI, K. M. KELKAR, A. RADMEHR and W. J. MINKOWYCZ 701 Professor Suhas V. Patankar on his 60th birthday

S. F. BENJAMIN and C. A. ROBERTS 703 Measuring flow velocity at elevated temperature with a hot wire anemometer calibrated in cold flow

T. HIBIKI and M. ISHII 707 Distribution parameter and drift velocity of drift-flux model in bubbly flow

W. WECHSATOL, S. LORENTE and A. BEJAN 723 Development of tree-shaped flows by adding new users to existing networks of hot water pipes

J. I. YOON, E. KIM, K. H. CHOI and W. S. SEOL 735 Heat transfer enhancement with a surfactant on horizontal bundle tubes of an absorber

V. I. RUDAKOV and V. V. OVCHAROV 743 Mathematical description of the diffusion in a temperature field and measuring the heat of transport

Y. ZHANG and A. FAGHRI 755 Heat transfer in a pulsating heat pipe with open end

G. TUNC and Y. BAYAZITOGLU 765 Heat transfer in rectangular microchannels

C.-L. YEH 775 Numerical investigation of the three-dimensional natural convection inside horizontal concentric annulus with specified wall temperature or heat flux

J. C. CHAI, T. M. TSAI, J. J. FOO and V. CHAN 785 Numerical computations of Factor Xa and thrombin productions using a finite-volume method

J.-F. MERCIER and C. NORMAND 793 Influence of the Prandtl number on the location of recirculation eddies in thermocapillary flows

R. M. MANGLIK and P. FANG 803 Thermal processing of viscous non-Newtonian fluids in annular ducts: effects of power-law rheology, duct eccentricity, and thermal boundary conditions

M. T. Schobeiri and P. Chakka 815 Prediction of turbine blade heat transfer and aerodynamics using a new unsteady boundary layer transition model

C. Camci and D. H. Rizzo 831 Secondary flow and forced convection heat transfer near endwall boundary layer fences in a 90° turning duct

H. C. No and H. S. Park 845 Non-iterative condensation modeling for steam condensation with non-condensable gas in a vertical tube

P. Keblinski, S. R. Phillpot, S. U. S. Choi and J. A. Eastman 855 Mechanisms of heat flow in suspensions of nano-sized particles (nanofluids)

H. Kobayashi, M. Kubo, T. Tsukada and M. Hozawa 865 Numerical analysis for photothermal poling process of nonlinear optical polymer film

J.-J. Hwang and C.-C. Lui 877 Measurement of endwall heat transfer and pressure drop in a pin-fin wedge duct

S. B. Jabrallah, A. Belghith and J. P. Corriou 891 Etude des transferts couplés de matière et de Chaleur dans une Cavité rectangulaire: application à une Cellule de distillation Study of heat and mass transfer in a rectangular cavity: application to a distillation cell

M. A. Ould Sid Ahmed and T. Lili 905 Prévision numérique des écarts entre grandeurs statistiques au sens de Favre et grandeurs statistiques au sens de Reynolds à partir d'un modèle au second ordre

D. Angirasa 919 Experimental investigation of forced convection heat transfer augmentation with metallic fibrous materials

Technical Notes

U. C. S. Nascimento, E. N. Macêdo and J. N. N. Quaresma 923 Thermal entry region analysis through the finite integral transform technique in laminar flow of Bingham fluids within concentric annular ducts

M. A. Seddeek 931 Effects of radiation and variable viscosity on a MHD free convection flow past a semi-infinite flat plate with an aligned magnetic field in the case of unsteady flow

February, Number 5

H. Koizumi 937 Laminar–turbulent transition behavior of fully developed air flow in a heated horizontal tube

L. M. Ferreira, J. A. M. Castro and A. E. Rodrigues 951 An analytical and experimental study of heat transfer in fixed bed

A. Pantokratoras 963 Laminar free-convection over a vertical isothermal plate with uniform blowing or suction in water with variable physical properties

L. L. Dong, C. S. Cheung and C. W. Leung	979	Heat transfer from an impinging premixed butane/air slot flame jet
T. L. Chan, C. W. Leung, K. Jambunathan, S. Ashforth-Frost, Y. Zhou and M. H. Liu	993	Heat transfer characteristics of a slot jet impinging on a semi-circular convex surface
Y. P. Wan, J. R. Fincke, S. Sampath, V. Prasad and H. Herman	1007	Modeling and experimental observation of evaporation from oxidizing molybdenum particles entrained in a thermal plasma jet
A. Bhattacharya, V. V. Calmidi and R. L. Mahajan	1017	Thermophysical properties of high porosity metal foams
Y. Y. Hsieh and T. F. Lin	1033	Saturated flow boiling heat transfer and pressure drop of refrigerant R-410A in a vertical plate heat exchanger
J. P. Garandet and C. Salvi	1045	Identification of furnace thermal characteristics from resistance measurements
M. Xu and L. Wang	1055	Thermal oscillation and resonance in dual-phase-lagging heat conduction
S. Richter, M. Aritomi, H.-M. Prasser and R. Hampel	1063	Approach towards spatial phase reconstruction in transient bubbly flow using a wire-mesh sensor
A. M. Ahmed and R. H. Rangel	1077	Metal droplet deposition on non-flat surfaces: effect of substrate morphology
M. Hirota, H. Fujita, L. Cai, H. Nakayama, M. Yanagida and A. Syafa'at	1093	Heat (mass) transfer in rectangular cross-sectioned two-pass channels with an inclined divider wall
S. L. Manzello and M. Y. Choi	1109	Morphology of soot collected in microgravity droplet flames
W. Wu, J.-H. Du, X.-J. Hu and B.-X. Wang	1117	Pool boiling heat transfer and simplified one-dimensional model for prediction on coated porous surfaces with vapor channels
J. Lahjomri, A. Oubarra and A. Alemany	1127	Heat transfer by laminar Hartmann flow in thermal entrance region with a step change in wall temperatures: the Graetz problem extended
Technical Notes		
M. R. Golriz and J. R. Grace	1149	Augmentation of heat transfer by deflectors on circulating fluidized bed membrane walls
S. Fan and J. R. Barber	1155	Solution of periodic heating problems by the transfer matrix method

C. J. Kobus and G. L. Wedekind 1159 An empirical correlation for natural convection heat transfer from thin isothermal circular disks at arbitrary angles of inclination

L. Wang and M. Xu 1165 Well-posedness of dual-phase-lagging heat conduction equation: higher dimensions

March, Number 6

Z. Mansoori, M. Saffar-avval, H. Basirat tabrizi and G. Ahmadi 1173 Modeling of heat transfer in turbulent gas–solid flow

L. S. De B. Alves, R. M. Cotta and J. Pontes 1185 Stability analysis of natural convection in porous cavities through integral transforms

J. Y. Tu and G. H. Yeoh 1197 On numerical modelling of low-pressure subcooled boiling flows

T. C. Cheng, J. T. Lir and T. F. Lin 1211 Stationary transverse rolls and U-rolls in limiting low Reynolds number mixed convective air flow near the convective threshold in a horizontal flat duct

F. K. Hsu and R. Greif 1229 Stagnation flow thermophoretic deposition with variable particle concentration in the mainstream

V. A. Chiriac and A. Ortega 1237 A numerical study of the unsteady flow and heat transfer in a transitional confined slot jet impinging on an isothermal surface

T. Shamim 1249 The effect of Lewis number on radiative extinction and flamelet modeling

R. Kumar Sahoo and W. Roetzel 1261 Hyperbolic axial dispersion model for heat exchangers

S. Repp, A. Sadiki, C. Schneider, A. Hinz, T. Landenfeld and J. Janicka 1271 Prediction of swirling confined diffusion flame with a Monte Carlo and a presumed-PDF-model

J. Massoni, R. Saurel, B. Nkonga and R. Abgrall 1287 Proposition de méthodes et modèles eulériens pour les problèmes à interfaces entre fluides compressibles en présence de transfert de chaleur
Some models and Eulerian methods for interface problems between compressible fluids with heat transfer

J.-M. Shi, M. Breuer and F. Durst 1309 Wall effect on heat transfer from a micro-cylinder in near-wall shear flow

S. Saravanan and P. Kandaswamy 1321 Stability of natural convective motion in pure water near 4°C contained in a slot with a moving sidewall

F. De Monte 1333 An analytic approach to the unsteady heat conduction processes in one-dimensional composite media

R. Seshadri, N. Sreeshylan and G. Nath 1345 Unsteady mixed convection flow in the stagnation region of a heated vertical plate due to impulsive motion

Technical Notes

H. Garbalińska 1353 Measurement of the mass diffusivity in cement mortar: use of initial rates of water absorption

H. Wang, X. F. Peng, B. X. Wang and D. J. Lee 1359 Jet flow phenomena during nucleate boiling

Y. Masuda, M. Yoneya, T. Ikeshoji, S. Kimura, F. Alavyoon, T. Tsukada and M. Hozawa 1365 Oscillatory double-diffusive convection in a porous enclosure due to opposing heat and mass fluxes on the vertical walls

I. Alam and P. S. Ghoshdastidar 1371 A study of heat transfer effectiveness of circular tubes with internal longitudinal fins having tapered lateral profiles

March, Number 7

X. F. Peng, Z. Y. Guo, J. P. Hartnett, W. J. Minkowycz, S. Sidemann, K. T. Yang, S. M. Yang and W. J. Yang 1377 Professor Bu-Xuan Wang, Chinese Academician, on his 80th Birthday

A. Pacheco-Vega, W. Franco, H.-C. Chang and M. Sen 1379 Nonlinear analysis of tilted toroidal thermosyphon models

S.-H. Peng and L. Davidson 1393 On a subgrid-scale heat flux model for large eddy simulation of turbulent thermal flow

I. S. Choi, J. D. Kim, E. Kim and J. I. Yoon 1407 Experimental characteristics of a storage tank on a harvest-type ice storage system

P. M. Coelho, F. T. Pinho and P. J. Oliveira 1413 Fully developed forced convection of the Phan-Thien–Tanner fluid in ducts with a constant wall temperature

E. Papanicolaou and V. Belessiotis 1425 Transient natural convection in a cylindrical enclosure at high Rayleigh numbers

S. Jeong and S. Garimella 1445 Falling-film and droplet mode heat and mass transfer in a horizontal tube LiBr/water absorber

D. O. A. Cruz and A. P. Silva Freire 1459 Note on a thermal law of the wall for separating and re-circulating flows

H. Kumano, A. Saito and S. Okawa 1467 Direct contact melting of porous material

I. Di Piazza and M. Ciofalo 1477 MHD free convection in a liquid-metal filled cubic enclosure. I. Differential heating

I. Di Piazza and M. Ciofalo 1493 MHD free convection in a liquid-metal filled cubic enclosure. II. Internal heating

H. S. Wang, H. Honda and S. Nozu 1513 Modified theoretical models of film condensation in horizontal microfin tubes

L.-J. Guo, G.-J. Li and X.-J. Chen 1525 A linear and non-linear analysis on interfacial instability of gas–liquid two-phase flow through a circular pipe

S. Anand, S. De and S. Dasgupta 1535 Experimental and theoretical study of axial dryout point for evaporation from V-shaped microgrooves

S. Sieniutycz 1545 Optimality of nonequilibrium systems and problems of statistical thermodynamics

Technical Notes

W. T. Cheng and H. T. Lin 1563 Unsteady forced convection heat transfer on a flat plate embedded in the fluid-saturated porous medium with inertia effect and thermal dispersion

B. S. Yilbas and M. Kalyon 1571 Analytical solution for pulsed laser heating process: convective boundary condition case

Book Review

J. Cervantes-De Gortari 1583 Shape and Structure, From Engineering to Nature, A Bejan, Cambridge University Press, Cambridge, 2000, 344 pp, hbk $110.00/£70.00 (ISBN 0-521-79049-2), pbk $39.95/£24.95 (ISBN 0-521-79388-2)

April, Number 8

W. Dai and R. Nassar 1585 An approximate analytic method for solving 1D dual-phase-lagging heat transport equations

M.-H. Lin and C.-T. Chen 1595 Numerical study of thermal instability in mixed convection flow over horizontal and inclined surfaces

R. D. Boyd Sr., P. Cofie and A. Ekhlassi 1605 Conjugate heat transfer measurements in a non-uniformly heated circular flow channel under flow boiling conditions

S. Roy, K. Nasr, P. Patel and B. Abdul Nour 1615 An experimental and numerical study of heat transfer off an inclined surface subject to an impinging airflow

J. Sucec 1631 Unsteady forced convection with sinusoidal duct wall generation: the conjugate heat transfer problem
